

AutolusAssist™ helps patients and providers navigate the many resources available during the treatment journey.

## Autolus Patient Support Program

- ✓ **Logistical support**  
Eligible patients who are enrolled in the Autolus Patient Support Program may be able to receive help with transportation, meals, and lodging.
- ✓ **Financial assistance**  
AutolusAssist can help eligible patients with benefits investigations, claims appeals, and financial support, including for those who are uninsured or underinsured.
- ✓ **Live support**  
Patients and providers can reach an Autolus Case Manager by contacting AutolusAssist for support 24 hours a day, 7 days a week.

## Autolus Support & Resources for Providers

Access to resources and support tools for providers to help patients wherever they are along the chimeric antigen receptor (CAR) T-cell therapy journey, including patient enrollment in the Autolus Patient Support program, product orders, tracking product status, and opt in to patient support programs and reimbursement support.

AutolusAssist also offers templates to help coordinate treatment preparation within the clinic or institution, including:

- ✓ **Prior Authorization Checklist**
- ✓ **Benefits Verification Checklist**
- ✓ **Letter of Medical Necessity Template**
- ✓ **Product Coding & Billing Guide**

## About Autolus

Autolus is a biopharmaceutical company developing next-generation, programmed T-cell therapies for the treatment of cancer and autoimmune disease. Using a broad suite of proprietary and modular T-cell programming technologies, Autolus is engineering precisely targeted, controlled, and highly active T-cell therapies that are designed to better recognize target cells, break down their defense mechanisms, and eliminate these cells. Autolus has an FDA-approved CAR T-cell therapy product, and a pipeline of product candidates in development for the treatment of hematological malignancies, solid tumors, and autoimmune diseases.

AUTOLUS CAR T-CELL THERAPY IS APPROVED FOR USE ONLY IN THE US.
